

## MÉTHODE DE MESURES POUR AUVENTS METHOD TO MEASURE AWNINGS

### METHODE DE MESURE POUR AUVENT

- 1 L'auvent devrait normalement excéder de 4" sur le devant et sur chaque côté du balcon.
- 2 Hauteur libre normale suggérer est de 78" sous la valance. La valance est la partie la plus basse de l'auvent.
- 3 La pente de l'auvent devrait être proportionnelle à la projection.
- 4 La distance maximale entre les poteaux de soutien ne devrait pas excéder 120" à 144" avec l'installation d'une poutre de type "pont". Cette distance est variable et doit tenir compte de la pente et la protection de l'auvent.
- 5 Un auvent dont la protection est de 84" ou plus nécessitera une structure renforcée.
- 6 Pour faciliter le calcul et pour déterminer le type d'auvent nécessaires vous aurez besoins des mesure suivantes

- A) La distance entre le balcon et le haut de la porte.
- B) La distance entre le haut de la porte et la corniche
- C) La largeur de la corniche
- D) La fascia de la corniche
- E) La longueur et la largeur du balcon

Les normes de mesures et d'installation ci-haut mentionnées sont considérées standard dans l'industrie.

### MEASURING METHOD FOR AWNINGS

- 1 The awning should normally exceed 4" on the front and on each side of the balcony.
- 2 Normal free height suggested is 78" under the valance. The valance is the lowest part of the awning.
- 3 The slope of the awning should be proportional to the projection.
- 4 The maximum distance between the supporting posts should not exceed 120" to 144" with the installation of a "bridge" beam. This distance is variable and must take into account the slope and protection of the awning.
- 5 An awning with a protection of 84" or more will require a reinforced structure.
- 6 For ease of calculation and to determine the type of awning you will need the following measurements

- A) The distance between the balcony and the top of the door.
- B) The distance between the top of the door and the cornice
- C) The width of the cornice
- D) The fascia of the cornice
- E) The length and width of the balcony

The preceding measuring and installation methods are considered standard in the industry.

# CHARTRE POUR AUVENTS AWNING CHART

Le résultat de **A** et **B** multiplié par **C** donne le nombre de pieds carré.  
The result of **A** and **B** multiplied by **C** will give total square feet.

## MÉTHODE DE MESURES POUR RAMPES METHOD TO MEASURE RAILING

## COMMENT MESURER UN ESCALIER EXISTANT POUR LA RAMPE HOW TO MEASURE AN EXISTING STAIRCASE FOR RAILING

Option 1

Option 2

### MÉTHODE DE MESURE

Commandez la rampe en donnant les mesures exactes du balcon et en spécifiant le nombre et les modèles de poteaux requis.

### METHOD TO MEASURE

Order railing by giving the exact measurements of the balcony and by specifying the quantity and model of posts required.

## MÉTHODE DE MESURES POUR LIMONS METHOD TO MEASURE STRINGERS

Plancher égal à la structure  
Floor even with frame

Plancher qui excède la structure  
Floor exceeds frame

### MÉTHODE DE MESURE Hauteur

Mesurez de la base de béton jusqu'au niveau du plancher du balcon.

### Projection

Mesurez de la structure du balcon jusqu'au début de la base de béton.

### Profondeur

Mesurez la profondeur de la base de béton.

### METHOD TO MEASURE Height

Measure from the concrete base to the level of the balcony floor.

### Projection

Measure from the balcony frame to the beginning of the concrete base.

### Depth

Measure the depth of the concrete base.

Lorsque vous placez votre commande, veuillez spécifier si le plancher est égale à la structure ou si le plancher excède la structure. Spécifier aussi si le balcon est en bois ou béton.

Si vous avez besoin de rampe avec les limons, nous effectuerons les calculs nécessaires et la rampe sera produite à la longueur requise.

When ordering, please specify if the floor is even with the frame or if it exceeds the frame. Also specify if the balcony is in wood or concrete.

If railing is needed with the stringers, we will make the calculations and produce the railing at the required length.

## MÉTHODE DE MESURES POUR LIMONS METHOD TO MEASURE STRINGERS

Prendre les mesures suivantes pour un escalier avec palier ou marches d'angles.

Supply the following measures for stairs with a landing or with corner steps.
